**DEPARTMENT OF THE AIR FORCE
AIR FORCE RESERVE
MILITARY CONSTRUCTION PROGRAM - FISCAL YEAR 1999**

SPECIAL PROGRAM CONSIDERATIONS

Pollution Abatement

The military construction projects proposed in this program will be designed to meet environmental standards. Military construction projects proposed primarily for abatement of existing pollution problems at installations have been reviewed to ensure that corrective action is accomplished in accordance with applicable standards and criteria.

Energy Conservation

Military construction projects specifically designed for energy conservation at installations have been developed, reviewed and selected with prioritization by energy savings per investment costs. Projects include improvements to existing facilities and utility systems to upgrade design, eliminate waste, and install energy saving devices. Projects are designed for minimum energy consumption.

Flood Plain Management and Wetlands Protection

Proposed land acquisitions, disposals and installation construction projects have been planned to allow for the proper management of flood plains and protection of wetlands by avoiding long term impacts, reducing the risk of flood losses, and minimizing the loss or degradation of wetlands. Project planning is in accordance with the requirements of Executive Order Nos. 11988 and 22990.

Design for Accessibility of Physically Handicapped Personnel

In accordance with Public Law 900-400, provisions for physically handicapped personnel will be provided for, where appropriate, in the design of facilities included in this program.

Preservation of Historical Sites and Structures

Facilities in this program do not directly or indirectly affect any district, site, building, structure, object or setting listed in the National Register of Historic Places, except as noted on DD Form 1391.

Environmental Protection

In accordance with Section 102(2)(c) of the National Environmental Protection Act of 1969 (PL 91-190), the environmental impact analysis process has been completed or is actively underway for all projects in this Military Construction Program.

Economic Analysis

Economics are an inherent aspect of project development and design of military construction projects included in this program. This program represents the most economical use of resources.

Reserve Manpower Potential

The Reserve manpower potential to meet and maintain authorized strengths of all Reserve flying/non-flying units in those areas in which these facilities are to be located has been reviewed. It has been determined, in coordination with all other services having Reserve flying/non-flying units in these areas, that the number of units of the Reserve components of the Armed Forces presently located in these areas, and those which have been allocated to the areas for future activation, is not and will not be larger than the number that can reasonably be expected to be maintained at authorized strength levels considering the number of persons living in these areas who are qualified for membership in those Reserve units.

Potential Use of Vacant Schools & Other State & Local Facilities

The potential use of vacant schools and other state and local owned facilities has been reviewed and analyzed for each facility to be constructed under this program.

Congressional Reporting Requirements

Page iii, titled "New Mission/Environmental/Current Mission Listing," is in response to a Senate Appropriations Committee requirement contained on page 10 (New and Current Mission Activities) of Report #100-380.

Unless otherwise noted, the projects comply with the scope and design criteria prescribed in Part II of Military Handbook 1190, "Facilities Planning and Design Guide."

10. Description of Proposed Construction: Construct a new facility with reinforced concrete foundation, concrete floor slab, structural steel frame, insulated walls and roof, fire protection system, utilities, and all necessary support.				
11. REQUIREMENT: 3,000 SM ADEQUATE: 0 SUBSTANDARD: 3,757 SM PROJECT: Consolidated Aircraft Maintenance Facility. (Current Mission) REQUIREMENT: An adequate facility, properly sized and configured, is required for aircraft maintenance and associated equipment maintenance and storage. This facility provides area for nondestructive inspection, engine inspection and repair, storage, and general purpose aircraft maintenance shops. CURRENT SITUATION: Currently, existing maintenance shops are housed in two separate facilities. These buildings are not properly configured or located, and have outdated mechanical, electrical, and ventilation systems. The main facility is over 55 years old and has numerous fire system deficiencies and requires frequent maintenance and repairs. Neither building can be altered or upgraded to meet mission requirements and one will be disposed of upon completion of the project. IMPACT IF NOT PROVIDED: Without this project, vital aircraft maintenance functions will continue to be degraded which would have an adverse impact on the unit's ability to maintain assigned aircraft. This would be detrimental to the Reserves ability to perform it's assigned missions at Maxwell AFB. ADDITIONAL: Cost estimate based on escalated A-E 100% Design. This new facility is sited on the opposite end of the runway away from the main base utility systems resulting in higher supporting facility costs. POC: Mr Edward Rodgers, HQ AFRES/CEPD, DSN 497-1056.

APPROPRIATION: MILITARY CONSTRUCTION, AIR FORCE RESERVE

PROGRAM 341.020 UNSPECIFIED MILITARY CONSTRUCTION \$4,603,000

PART I - PURPOSE AND SCOPE

The funds requested for unspecified military construction will finance new construction projects having cost estimates less than \$1,500,000.

PART II - JUSTIFICATION OF FUNDS REQUESTED

The funds requested for unspecified military construction will finance unforeseen projects generated during the year and are necessary to support mission requirements.

11. REQUIREMENT: As required. PROJECT: Unspecified Minor Construction REQUIREMENT: This appropriation provides a lump sum amount for unspecified minor construction projects, not otherwise authorized by law, having a funded cost less than \$1,500,000, including construction, alteration or conversion of temporary facilities, in accordance with Title 10, USC 18233 and 18233a. These projects are not now identified but are expected to arise in FY 99. IMPACT IF NOT PROVIDED: No means to accomplish exigent projects less than \$1,500,000 will exist, serverly degrading the ability of the Air Force Reserve to efficiently and effectively address unforeseen facility modification, alteration and conversion requirements.

10. Description of Proposed Construction:						
11. REQUIREMENT: As required. PROJECT: Planning and Design (Current Mission) REQUIREMENT: Funds for architectural and engineering services and construction provide for the completed design of facilities and evaluation of designs in terms of technical adequacy and estimated costs. In addition, these funds are required to prepare site surveys, develop master plans, working drawings, specifications, project planning reports, and design required for those construction projects included in the Air Force Reserve Military Construction Program. The advanced age and continued deterioration of the Air Force Reserve physical plant and infrastructure have generated numerous facility requirements requiring these architectural and engineering services for design. It is essential the Air Force Reserve be funded at the requested level to ensure operational readiness is not hampered or degraded due to inadequate facilities. IMPACT IF NOT PROVIDED: Continued design on this fiscal year program, as well as future year MILCON programs, will be impossible.
